Doc-93-253

Gentlemen;

As I understand it, the FCC is an independent regulatory agency.. with members serving overlapping terms of office -- appointed by the President -- but not subject to removal by the President.

If that is a GIVEN, then the FCC is free to arrive at its own decision concerning the question of AUCTION vs LOTTERY on Interactive TV Licenses..

The President may: suggest - request -- recommend -- advise --threaten -- BUT not force a policy decision on the FCC.

When I hear the President with his strange , twisted logic calling for AUCTION ONLY ostensibly to deny a windfall to any luckyparticipant in order to AUCTION the license to the highest bidder --knowing full well that only the super wealthy will get the licenses -- I am struck by the illogical rationale employed here: The President from his neo Marxist philosophy about the wealthy, is playing right into the hands of the wealthy on this issue; punishing the average risk taking citizen in order to reward the super rich!

ALL DONE IN THE NAME OF FAIRNESS!!

Clinton is a Marxist Socialist, and his hidden agenda for America is to SOCIALIZE America as quickly as possible-- and he will use any alliance to accomplish that goal.

I would urge the Board members to reject the Presidents request for the AUCTION method and re-establish the original LOTTERY. Many Americans have invested hard earned money to be a part of the Lottery program, and in the name of JUSTICE and FAIRNESS, I am requesting the Board to decide in favor of the LOTTERY.

Regards,

Ken Sikorski

TO ALL MEMBERS OF CONGRESS:
FCC MAIL ROOM

If you think Health Care is expensive now, wait until you see what it costs when its FREE.

The current Health Care Reform proposal is so narrow in focus that it fails to allow for the PERSONAL service Health Insurance Agents provide policyholders every day.

Explanation of available coverage, custom tailoring coverage to the clients needs, and assistance in filing claims are just a few of the services we provide each day...ALL at NO COST to the TAXPAYERS. These services CANNOT be provided by any government bureaucracy.

I have persisted in my efforts to verify the claim of 37 million Americans UNINSURED because they cannot get or afford health insurance. No one in Congress or the White House has responded. Fright tactics without sum or substance are being used to stampede the Congress and public at large into a frenzy for health care reform!

The Cato institute develops RELIABLE figures showing some 6 million uninsured for probable reasons of cost; and that figure is somewhat exaggerated since there is no precise factor or measurement for what degree of responsibility these persons exercise in setting personal priorities in their expenditures; how much more they prefer gambling, drinking, smoking, football and other spectator sports, over the responsibility to provide Health Insurance for personal and family protection.

Some 2 million Health Insurance agents in America face loss of careers should the Clinton Reform Proposal be enacted.

In the light of this staggering number of health care professionals and their families deprived of their careers and livelihood..the diminished service quality insured Americans would receive and the additional cost and burden placed on business, the federal and State governments; I hope your shrewd and enlightened vote to this Socialistic scare tactic developed by the Clinton administration will be a resounding "NO"!

Sincerely,

Ken Sikorski
